IDEAS MAKEOVERS LAYOUTS

INTRODUCTION

There's so much more to designing and decorating a bathroom than you could ever imagine! This book has been specially designed and developed by Rocell, to introduce you to a whole new world of creative possibilities and ideas along with guidelines and tips to make your bathroom everything it should be.

Our philosophy is helping you create the perfect bathroom through beautiful use of the space, no matter the size, budget or requirement. This design guide includes a variety of layouts best suited to different types of bathrooms along with plans and inspiring reference images in 3D. These will help you make the best use of your space and create a beautifully designed masterpiece that reflects your personal sense of style.

Rocell is always committed to inspiring the most elegant bathrooms with an exclusive choice of designer bathware, tiles and accessories available at its many showrooms. This book brings you a step closer to transferring your ideas into the ultimate bathroom of your dreams.

WHAT IS A BATHROOM?

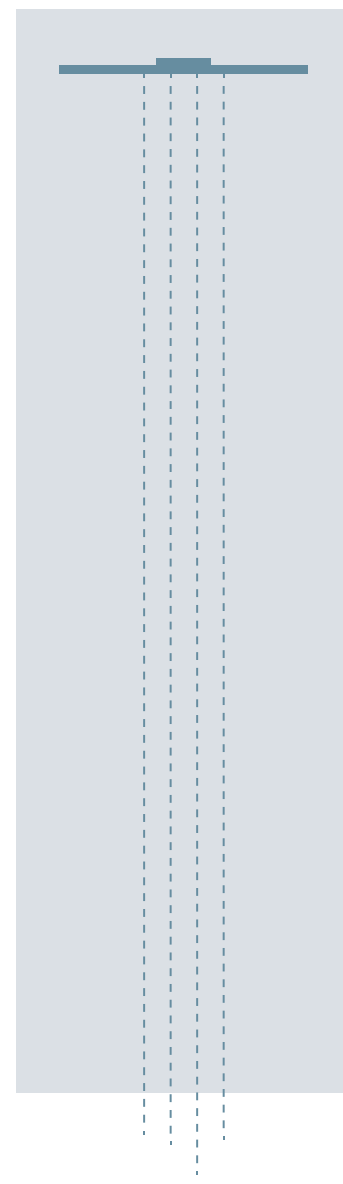

The concept of bathrooms and their need have evolved significantly over the past millennia. Far back in history, very little importance was placed on personal hygiene and the act of bathing itself was considered more ritualistic. Later on in the case of public baths, bathing was a reason for meeting people. Needless to say, personal bathrooms in homes were non-existent.

It was only in the 19th century that people became more concerned with cleanliness, and bathrooms were given their own permanent spaces in homes. As time evolved, new technologies were developed, along with newer models, materials and coverings that proved more resistant to humidity and water. These were selected according to personal preferences.

Today bathrooms are of equal or higher importance as any other room in the house. Health and relaxation play a significant role along with cleanliness and hygiene. Modern bathrooms are designed to be both functional and as quiet places for rest and relaxation, allowing for the combined use of traditional materials such as wood, glass, ceramic and marble. Modern accessories not only add personality to the room but also permit a considerable increase in functionality.

Today a bathroom is many different things. A functional place for hygiene, a place for tranquility and alone time or a place to refresh and rejuvenate. And its design and layout is a beautiful reflection of its owner's personality and sense of style.

TYPES OF BATHROOMS

POWDER ROOM

Powder Rooms or 'Guest Bathrooms' are small and compact and are usually on the first floor of homes, for the convenience of guests. For this reason, they are designed and decorated with more care and detail to impress visitors while expressing a personal sense of style. For maximum beauty and elegance, consider the limited space and keep things simple and uncluttered. An elegant choice of bathware, a stylish choice of accessories, beautifully placed mood lighting for ambience and an overall, rich finish will complete the picture.

From a functional point, these small bathrooms which are sometimes referred to as 'half baths', usually contain a water closet and a wash basin with a mirror over it. Their first floor positioning allows guests to use them without feeling as though they have intruded in your home.

LUXURY BATHROOMS

Luxury Bathrooms are all about large spaces, premium quality bathware, tasteful design and an aura that exudes a sense of luxury and elegance.

The main fittings in a Luxury Bathroom would be a water closet, bidet, wash basin and a shower cubical with one or more showers. Depending on space and budget, you could go one step further and install a luxurious addition such as a Jacuzzi.

However, beautiful fittings and a professionally-designed interior are not enough. Remember, the 'luxury' is in the details. Focus on creating the right ambience, a feeling of relaxation, comfort and bliss. Scented candles, a few books, an ornate mirror and fluffy towels add an aura of charm and good taste to a bathroom. A basket of pot pourri, a small bowl of fresh flowers and potted plants can create a cosy, relaxed atmosphere. Little figurines and scented hand soaps and creams on the counter will instantly add a welcome feeling to your Luxury Bathroom.

FAMILY BATHROOMS

Ample space is an integral feature of a Family Bathroom as it must be shared by two or more people. Family Bathrooms are often designed with two washbasins ('his' and 'hers' for time saving), a water closet, bidet, shower cubical (sometimes two showers) and a bathtub.

The bathtub is the centre of focus in a Family Bathroom and must be given prominence and pride of place. What's more, to allow more than one family member to use the bathroom at the same time, the water closet should be installed in a separate area, allowing for privacy.

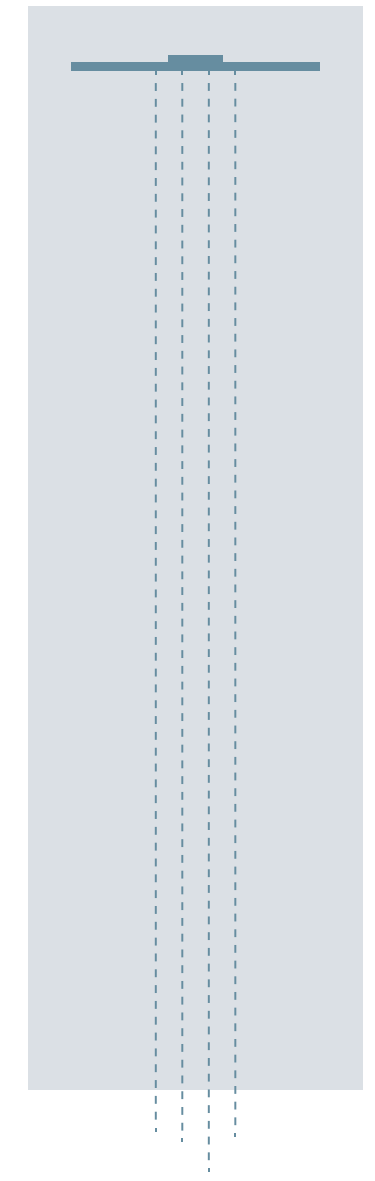

Every member of the family should feel comfortable in the bathroom so ensure that the bathroom is spacious with plenty of storage space for personal items. A clean layout, well placed fittings, and less clutter will ensure that the Family Bathroom is a happy, welcoming place for the whole family.

SMALL BATHROOMS

This is a complete bathroom with basic requirements such as water closet (with or without a bidet), washbasin and a shower (with or without a cubical), with everything fitted out astutely within a small area. Naturally, the shapes and sizes of the products installed should support the limited space of a Small Bathroom.

DESIGN
STYLES OF BATHROOMS

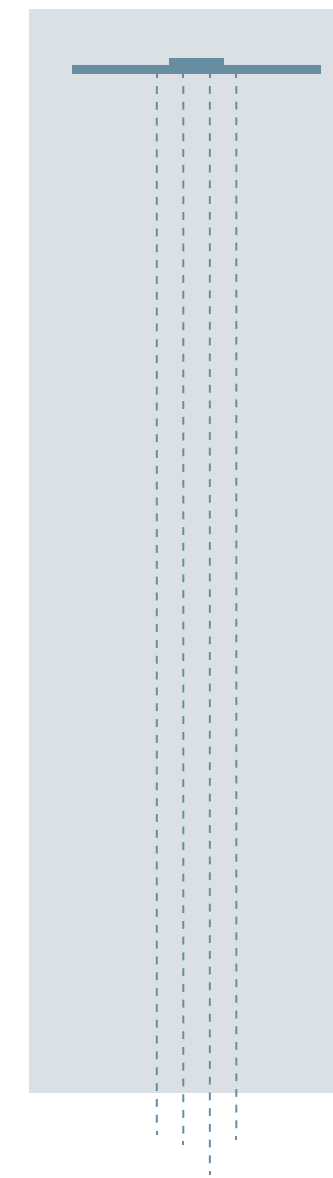

MODERN

AN EXPRESSION OF UNDERSTATED CHIC

Stylishly minimalistic, a MODERN bathroom is simply a masterpiece of open spaces, clean lines, geometric contours and subdued colours. It's about speaking volumes with less and is almost always designed on the architectural principle that forms follows function. Originating from as far back as the 1920's a modern bathroom instantly evokes a sense of relaxation and calm with its impeccable balance of starkness and symmetrical design which is far from the ordinary.

A modern bathroom can be artistically structured to suit individual tastes going from stark and clean to bold and bright, with stylishly sophisticated tiles and bathware laying a foundation of elegance. Personal touches of expression can be included with decorative elements such as a potted plant, a corner chair and contrasting towels and bathmats. Built-in shelving and cabinetry block out clutter and distraction while free standing bathtubs are a distinct feature of today's modern bathroom.

CLASSICAL

CLASSICAL AND FOREVER IN STYLE

A CLASSICAL bathroom is a reflection of imperial dignity, elegantly reflecting its ornate origins in ancient Greek and Roman architecture and design. It is a spectacular presentation of bathware in muted, pastel colours which can be enhanced by gilt elements, brass and metal fittings and the grandeur of marble.

Order, symmetry and balance are beautifully integrated into every aspect such as fittings, layout, colours and accessories, adding a bold sense of elegance and grandeur. Fabric accessories such as bath rugs and towels are often embellished with embroidery and thread work while additional accents like ornate mirrors and regal artefacts can be placed strategically to bring about a bold, personal touch. Today, the classical bathroom takes on a timeless presence with newer finishes that reflect the beauty of the past.

RUSTIC

BRING TOGETHER YOUR LOVE FOR 'LIVED-IN' AND 'NATURAL'.

What spells RUSTIC to perfection is an artfully balanced ensemble of raw, natural materials, earthy tones and hues and that charming, lived-in feel, all blended with artistry.

Bring the outdoors in with accents and highlights in wood and wooden textures which are regarded as the foundational material for rustic design. Wooden shelving, mirror frames and counter tops instantly bring 'rustic' into your bathroom. Pristine, white walls help accentuate the earthy, natural feel of the wood while presenting a stark backdrop for decorative elements such as antique mirrors, wrought iron picture frames or vintage artefacts. Add a spark of colour. Opt for fabric accessories such as towels, rugs and shower curtains in tones of green, gold and rustic red. Soft lighting will shed a charming, welcoming ambience across it all.
